

# TOWNSEND CENTRE HAZARD IDENTIFICATION AND RISK ASSESSMENT

Activity: Swanage Tourism / Community Plan	No: PRA43	Assessor:	Date:	Location: Swanage Town	Centre or school led: Centre
Hazard		Control Measures			Who's affected?
Crossing the High Street		Some blind spots so make sure you have a good view of oncoming traffic.			P, CS, SS
Narrow pavements		Single file and keep everyone up together. Stop to let people/hazards pass			P
Stopping points near roads		Only stop where there is enough room for the group and members of the public to pass without stepping into the road.			P, Pub
One way streets (Swanage has a one way system but with 2 way roads leading from it!)		Check signs and flows of traffic to determine direction of travel.			P, SS
Steep, slippery slopes partic. Church Lane (opposite Arkwrights Store)		Keep group together and control pace by staying at the front.			P, CS, SS
Members of the public		Students may be allowed to go off in small groups unsupervised. As part of their safety brief they should be told not to go off with any member of the public under any circumstance. Also they should be reminded to exercise caution when talking to the public and be polite and courteous at all times. A member of staff should be available at a known place so students can report any incident. Any incident deemed serious enough should be passed onto the police to follow up.			P
