Aim: to produce a poster, leaflet or PowerPoint presentation showing ways of reducing the impacts of either: pandemics, earthquakes or climate change.

Task:
- For this activity, you will need to use the cards from the “Flashpoint problems and solutions” activity and your own research.
- You need to choose a flashpoint: pandemics (swine flu), earthquakes or climate change as your topic.
- Produce a poster, leaflet or PowerPoint presentation showing ways of reducing the impact of your chosen flashpoint.

Content:
Include an introduction to your topic, the problems and the possible solutions. Make sure you have enough information and appropriate pictures/graphics to include. Below are some useful research links to get you started:

Research links:

- BBC – Global Climate Change
- Lookoutlearning – Climate change quiz
- Small Farmers Big Change
- BBC – the affects of climate change on wildlife

**What should I include?**
Make sure your work is eye-catching and well presented, but should have a balance of text and pictures. You should also try and include the key words below within your text.

adapt  prepare  educate  change  develop  relocate
