What do we do that causes CO2 to be released into the atmosphere?

Welcome to Professor Ivan Atmosphere’s introductory lecture!
Most carbon dioxide released in the UK comes from the energy industries.
Aviation fuel releases carbon dioxide
Nearly a quarter of carbon dioxide released in the UK comes from road transport.
We use **energy** such as electricity in our homes.
Carbon dioxide is also released from other industries.
Most carbon dioxide released in the UK comes from the energy industries.

Nearly a quarter of carbon dioxide released in the UK comes from road transport.

Aviation fuel releases carbon dioxide.

Carbon dioxide is also released from other industries.

We use energy such as electricity in our homes.

These are some of the things we do that cause CO₂ to be released into the atmosphere...Thanks for watching!
