- Welney
- Llanelli
- Slimbridge
- Steart
- London
- Arundel
Areas of study

- Coastal realignment
- Wetland restoration and conservation
- Natural flood management
- Wetlands and climate change
- Environmental change in freshwater ecosystems
- Freshwater ecology
- Migration
- Plastic pollution
Supporting resources

Ecosystems and environmental change

Discover the role of wetlands in providing important habitat, cleaning water, reducing flood risk and preventing climate change. How might human activities help to protect and enhance wetland environments? How might they pose a danger to these environments?
