Are you flood ready?

**Flood kit suggestions**

Remember:

- You might have to wait **24 hours** to be rescued (sometimes people have to sit on the roofs of their houses!)
- Nothing will work in your house if **electricity** has failed!
- Flood water may be **contaminated** with sewage and you may have been in contact with this polluted water!
- If the waters were fast flowing, people may have been hurt or bruised by the **hydraulic** force of the water or the **abrating** force of objects carried by the flow!

So what should be stored in your flood kit, in case of emergency?
