

Mississippi Flooding: Storyboard

		
<p>The upper valleys of Minnesota received x4 normal rainfall in 14 days</p>	<p>The river banks have been built up with more impemeable surfaces (less rain filtration)</p>	<p>The levees made the water move downstream faster</p>
		
<p>The river had swollen 6 times its usual size</p>	<p>The banks burst and damaged the cities + the residents' homes</p>	<p>1440 homes were damaged, 392 killed</p>
