Aviation fuel releases carbon dioxide

your climate your life

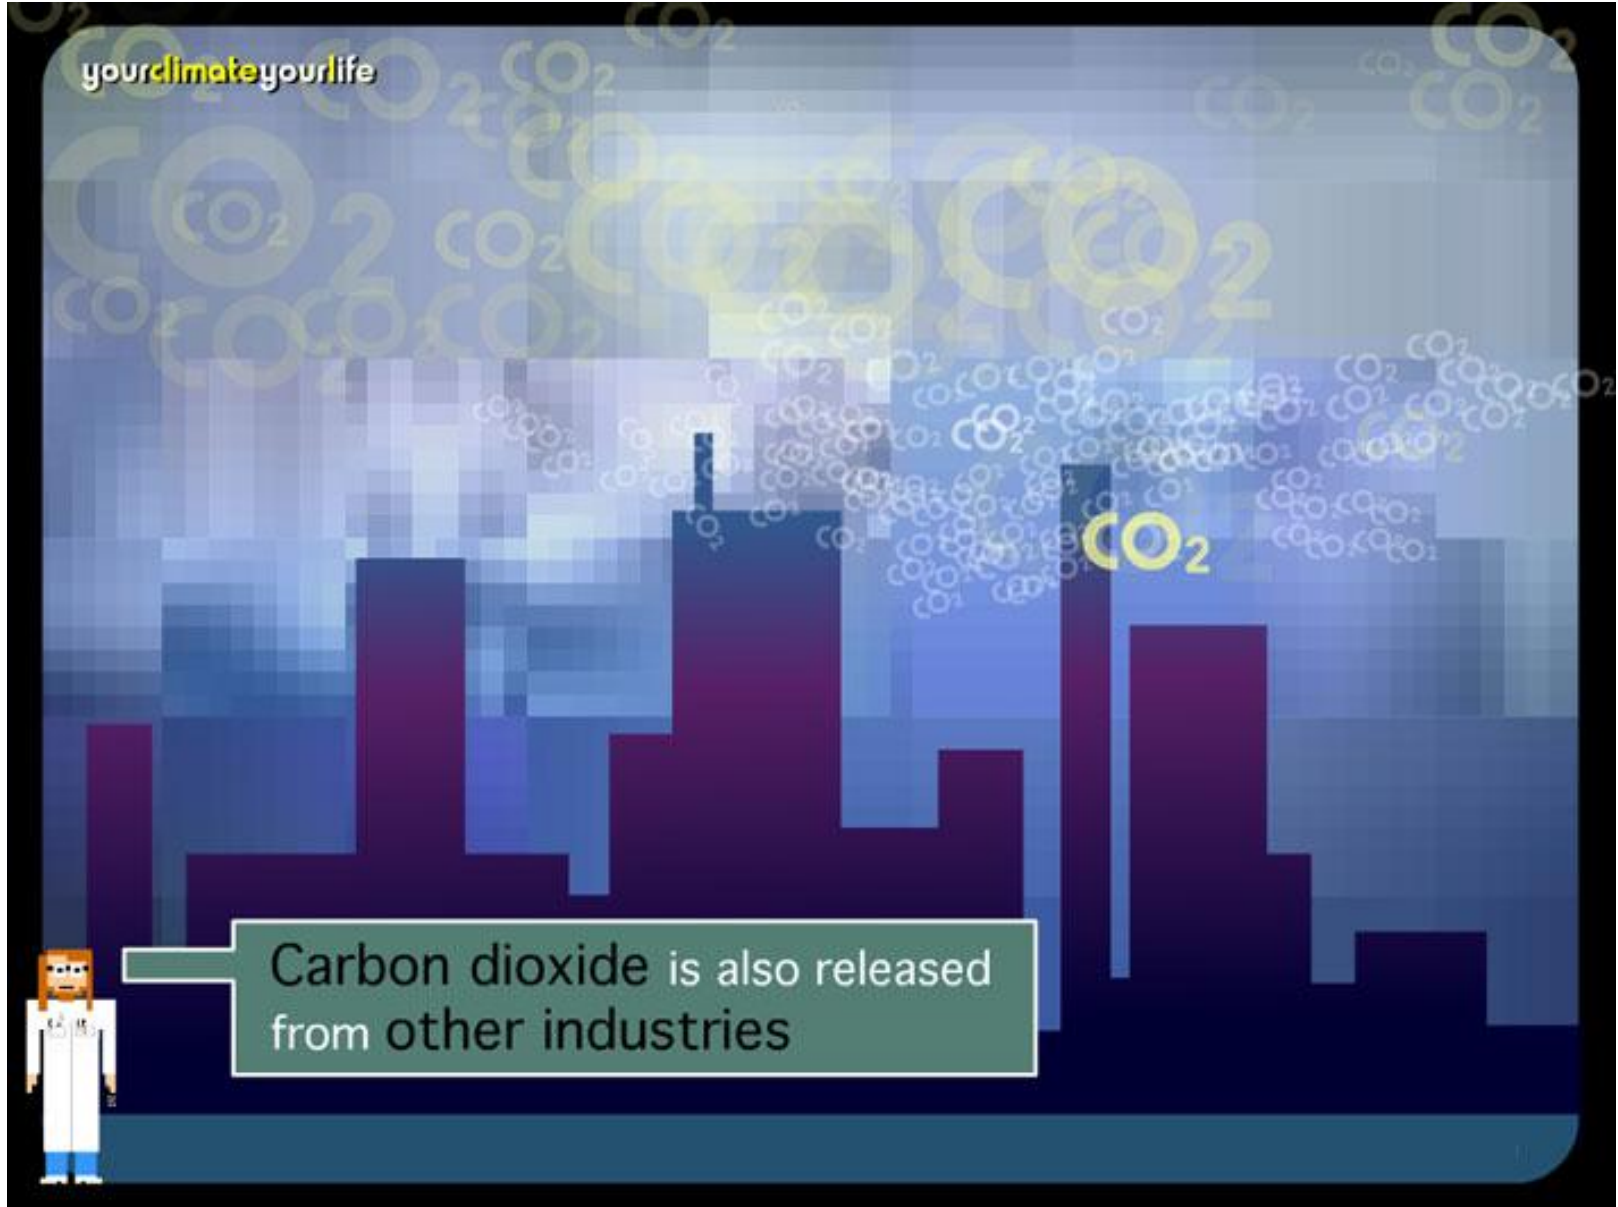

Nearly a quarter of carbon dioxide released in the UK comes from road transport

We use energy such as electricity in our homes

Most carbon dioxide released in the UK comes from the energy industries

Nearly a quarter of carbon dioxide released in the UK comes from road transport

Aviation fuel releases carbon dioxide

Carbon dioxide is also released from other industries

We use energy such as electricity in our homes

These are some of the things we do that cause CO₂ to be released into the atmosphere...Thanks for watching!
