

Are you flood ready?

Flood kit suggestions

Remember:

- You might have to wait **24 hours** to be rescued (sometimes people have to sit on the roofs of their houses!)
- Nothing will work in your house if **electricity** has failed!
- Flood water may be **contaminated** with sewage and you may have been in contact with this polluted water!
- If the waters were fast flowing, people may have been hurt or bruised by the **hydraulic** force of the water or the **abrading** force of objects carried by the flow!

So what should be stored in your flood kit, in case of emergency?

Food and drink items	Medical supplies	Clothing and warmth	Other items
