

Follow-Me Loop Card Activity

Instructions:

- There are seventeen cards in this pack- enough for one between two.
- Each card contains one answer (typed in black) and one question (typed in blue).
- The teacher also has a card and starts the game by reading out the first question from it.
- Only one card contains the correct answer- which a pupil will read aloud to the class.
- Having read the correct answer, the pupil continues the loop by reading their accompanying question.
- The loop activity will always finish with the teacher, who has the final answer.

This game should be fast paced. Additional questions and answers can be added by the class teacher as needed.

Teacher: First Question

A river often starts high in the mountains. Where a river starts is called the what?

Teacher: Last Answer

The River Severn

The source.

Where a river ends is called what?

The mouth or estuary.

A river can be divided into how many stages?

<p>Three. The upper course, middle course and lower course.</p>	<p><i>True or false?</i> <i>The water is fast flowing in the upper course of the river.</i></p>
<p>True.</p> <p>But a river is even faster flowing in the middle course.</p>	<p><i>True or false?</i> <i>Waterfalls are often found in the lower course of a river.</i></p>
<p>False.</p>	<p><i>In the upper course of a river is the land steeper or flatter than in the other courses?</i></p>
<p>Steeper.</p>	<p><i>What type of valley shape is visible in the upper course?</i> <i>A)U shaped valleys</i> <i>B)V shaped valleys</i> <i>C)W shaped valleys</i></p>
<p>V shaped valleys.</p>	<p><i>A river is made when lots of smaller streams join together. The name for these smaller streams is what?</i></p>

Tributaries.	<i>In the middle course the river begins to curve. What is the term for this curve or bend?</i>
A meander.	<i>Does the water on the outside of the meander flow faster or slower than the water on the inside of the meander?</i>
Faster.	<i>In what part of the meander is erosion more likely to occur?</i>
The outside of the meander.	<i>The river carries eroded material downstream. What is the term for this?</i>
Transportation.	<i>On the inside of the meander the river is likely to 'drop' or deposit rocks and debris. What</i>

	<i>is the term for this?</i>
Deposition.	<i>When the meander is cut off from the main part of the river what is formed?</i>
An oxbow lake.	<i>What is precipitation?</i>
Rain, snow, hail and sleet – anything that falls from clouds.	<i>The estuary is where the river meets what?</i>
The sea.	<i>The estuary of the River Thames meets what sea?</i>

The North Sea.

*What is the name of the UK's
longest river?*
