

MODULE 8: HOW WILL BANGLADESH'S NUMBER OF HOT DAYS AND NIGHTS CHANGE BY 2090?

TEACHING ACTIVITY PLAN: BANGLADESH

ACTIVITY ONE

- The north of the country will warm more than the south as it is further away from the moderating influence of the sea.

ACTIVITY TWO

- Chittagong will warm by 3.5°C all the other places will warm by 4.5°C

ACTIVITY THREE

- The north of the country will warm more than the south.
- The effect of latitude is increased as the sun's rays reach the highest latitude in the northern hemisphere at the Tropic of Cancer and the southern hemisphere is furthest way from the sun. For a further explanation see http://www.geographyteachingtoday.org.uk/images/activities/climate_system.html

ACTIVITY FOUR

- The north of the country will warm more than the south.
- The least warming will take place in DJF than in the other months.
