

MODULE 8: HOW WILL ARGENTINA'S NUMBER OF HOT DAYS AND NIGHTS CHANGE BY 2090?

TEACHING ACTIVITY PLAN: ARGENTINA

ACTIVITY ONE

1. The north of the country will warm more than the south.
2. The region closer to the Andes and further away from the sea in the north will warm the most.

ACTIVITY TWO

1. The north of the country will warm more than the south.

ACTIVITY THREE

1. The north of the country will warm more than the south.
2. The effect of latitude is increased as the sun's rays reach the highest latitude in the northern hemisphere at the Tropic of Cancer and the southern hemisphere is furthest way from the sun. For a further explanation see http://www.geographyteachingtoday.org.uk/images/activities/climate_system.html

ACTIVITY FOUR

1. The north of the country will warm more than the south.
2. The least warming will take place in JJA.
